by-mena.dev | [LinkedIn](#) | [GitHub](#)

Fullstack software engineer with production experience building scalable web applications using **React**, **TypeScript**, **Node.js**, and **PostgreSQL**. Proven ability to collaborate in agile teams and deliver features that serve real users.

Experience

Software Engineer | Digital Aid Seattle (Remote, WA)

May 2026 - present

- Collaborated with 2 engineers and 2 project managers using **Scrum** methodology to deliver an Azure integrated application serving 10+ organizational users for senior advocacy nonprofit.
- Engineered comprehensive client reporting system with dynamic filtering, custom report generation, real-time data syncing, and audit logging to track user actions and data changes across the platform.
- Developed and maintained frontend features in **React/TypeScript** with **TanStack Query** for state management, integrating seamlessly with **FastAPI/Pydantic** backend and **Azure Database**.
- Participated in weekly standups, sprint planning, code reviews, and **Agile** development workflows to ensure code quality and timely feature delivery.

Head Teacher | Saint Frances of Rome (Cicero, IL)

Aug 2024 - July 2026

- Managed classroom of 20 children ages 3-5, implementing weekly lesson plans and individualized activities to support developmental growth.

Education

Computer Science | The Odin Project, Remote

Jul 2025 - April 2026

9-month intensive Fullstack Engineering curriculum in **JavaScript**, **React**, **Node**, and **TDD**.

Bachelor of Science in Psychology and Child Development | Northern Illinois University, DeKalb, IL

Aug 2018 - May 2022

Projects

Cosmetic Tracker ([source](#)) | *TypeScript, TanStack, React, Vite, PostgreSQL, Prisma, Node.js, Express, Passport* — Full-stack web application with user authentication, relational database design, and social features including user following and post creation. Built with RESTful API architecture and secure session management.

Social Media Platform ([source](#)) | *React, Vite, PostgreSQL, Prisma, Node.js, Express, Passport* — Real-time social media application with 1:1 direct messaging using debounced updates, follow/unfollow system, user profiles, and full CRUD operations for posts. Implemented complex relational database schema with Prisma ORM.

Authenticated Message Board ([source](#)) | *TypeScript, TanStack, React, Vite, PostgreSQL, SQL, Node, Express, EJS, Passport* — Authentication-based messaging platform with role-based access control and server-side rendering. Implemented secure user registration, login, and session management using Passport.js.

Skills

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS **Frontend:** React, TanStack Query, Tailwind CSS, Material UI, Vite, Responsive Design, WCAG **Backend:** Node.js, Express, FastAPI, Pydantic, REST API, OAuth 2.0, WordPress **Database:** PostgreSQL, Prisma, SQL, Azure Database **Tools & Methods:** Git, GitHub, Agile, Scrum, Code Reviews, CI/CD, Jest, Test-Driven Development, Figma
